PLEASE NOTE: Quality of photocopies is dependent on the quality of the original or master copy. Age, paper quality, condition, ink colors, printing, etc., are all contributing factors. Therefore photocopies are sold “as is” with **no** returns accepted.

Pagination: Page numbers listed represent the number of pages making up the document not necessarily the actual number of photocopy pages.

Unfortunately, I lack both the time and expertise to serve as an appraiser or broker. Nor to give advice on locating or fabricating replacement parts.

In order to continue my definitive history series on American manufacturers of woodworking machinery, I'm interested in acquiring by loan, gift, or photocopy, any and all documents, catalogs, manuals, photos, trade journals, personal reminiscences, etc., pertaining to woodworking machinery and/or their manufacturers, past or present. All assistance will be acknowledged in print. Loaned material will be treated with care and promptly returned. **WRITE** with particulars.

ATTENTION!

The purpose of my small, part-time photocopy service is twofold: to help out fellow antique woodworking machinery enthusiasts and to help generate badly needed research funds to continue work on my histories of American manufacturers of woodworking machinery. Your cooperation in not passing on material obtained from me to web sites would be greatly appreciated.
